Mechwass Engineering Co., Ltd

Mechwass is a company focus on conveyors for the food industry. We will work with you to gather the proper advice. We will learn about your product, requirements, and workshop situation to help you determine the best conveyors for your application. We know that providing honest and trustworthy advice, products, and services to you is the best way to ensure that our company grows and prospers—by way of reputation, referral, and a loyal customer base. The quality and service you get with us are unmatched, and your trust means everything to us.

High quality, custom, and something is valuable

BUCKET ELEVATOR (MWA-BE)

Bucket Elevators for a wide range of product transportation, it combines vertical and horizontal sections that offer a reliable and effective method of conveying. The flexible sizes adapt to the manufacturing environment. Multiple-outlets different target speeds feeding system design available manufacturing space packaging and distribution requirements.

Application Industry

Frozen foods

Pet food

Fruit

Granular

Dry food, pasta etc

Confectionery

Fresh meat & Poultry

Salad

Non-food products

Sanck foods

Advantages

- Superior product handling of free-flowing products
- High speeds and operating efficiency and operator friendly
- Gentle product handling minimizes breakages
- Reduce factory production space
- Camera monitoring
- Multifunctional
- Low total cost of ownership

Specification

Model#	Bucket Size	Conveying Capacity	Horsepower	Speed
MWA-BE1	1L buckets	1-3CBM/H	0.75KW	VFD drive control system
MWA-BE1.8	1.8L buckets	3-6CBM/H	0.75-1.5KW	VFD drive control system
MWA-BE3.8	3.8L buckets	6-8CBM/H	1.5-2.2KW	VFD drive control system

Buckets options

Plain bucket

Dimpling bucket

Stainless steel bucket

BELT CONVEYOR MWA-BC1

Belt conveyors are good solutions for moving various bulk or unit load products through manufacturing and processing environments. Normally, they are a low-cost option and high capacity for the product to be transferred at varying speeds. The system is available in a range of specifications to suit the application.

Application Industry

Frozen foods

Pet food

Fruit

Granular

Dry food, pasta etc

Confectionery

Fresh meat & Poultry

Salad

Non-food products

Sanck foods

Belt options

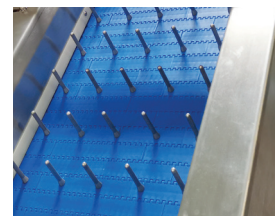

Standard pu belt

Standard modular belt

Stainless steel mesh belt

Bean sprout belt

Curved PU belt

Curved PP belt

Advantages

- Superior product handling of free-flowing products
- High speeds and operating efficiency and operator friendly
- Gentle product handling minimizes breakages
- Easy cleaning and conformity to hygiene regulations
- Easy wash down design with wash proof IP65 rating
- Camera monitoring
- Multifunctional
- Low total cost of ownership
- Maximize throughput of production system

VIBRATION HOPPER MWA-VH1

Dimpling Hopper

Plain Hopper

Compact body and small factory footprint Sanitary and easy-to-clean design, with stainless steel hoppers and feeders. Gentle product handling with minimal drop heights to maximize quantity.

Application Industry

Frozen foods

Pet food

Fruit

Granular

Dry food, pasta etc

Confectionery

Fresh meat & Poultry

Salad

Non-food products

Snack foods

Custom Design

Share a hopper

Long feeding

420L hopper

ACCUMULATION TABLE (MWA-AT1)

FINISHED BELT CONVEYOR (MWA-FC1)

The finished belt conveyor and accumulation table are for the end of line collecting finished bags from the packaging machine and wait for the next operation.

Application Industry

Frozen foods

Pet food

Fruit

Granular

Dry food, pasta etc

Confectionery

Fresh meat & Poultry

Salad

Non-food products

Sanck foods

Advantages

- Integration to other baggers
- Sizes customized
- Low total cost of ownership
- High speeds and operating efficiency and operator friendly
- Great for all types of bags and products

Specification - There are pan sizes options:

Type	Diameter	Height	Speed
MWA-AC001	1000mm	825mm	VFD drive control system
MWA-AC002	1200mm	825mm	VFD drive control system
MWA-AC003	1500mm	825mm	VFD drive control system

Options

Pan type

Angle adjustable

Curved type

L type

Customized

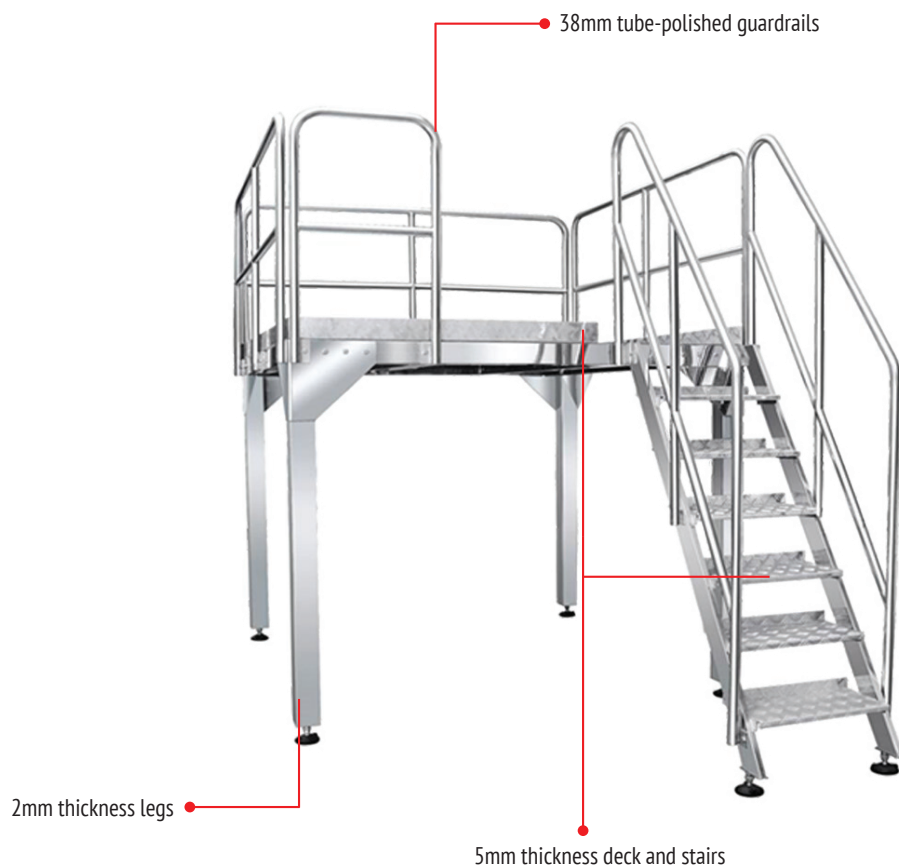

Z type

MEZZANINE PLATFORM

(MWA-MP1)

The key point for the mezzanine is to be strong enough to hold the multihead weigher, workers operation there.

Customized Machines

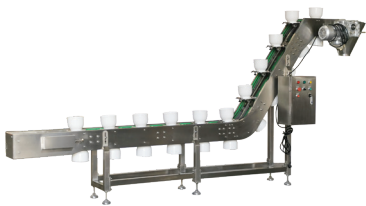

Stainless Steel Cup Conveyor

Dimpling Cup Conveyor

Plastic Cup Conveyor

Z Type Plastic Cup Conveyor

Long 3.8L Bucket Elevator

Multiple Discharge Bucket Elevator

Single Bucket Elevator

Vertical PU Belt Conveyor

Bean Sprout System

Bean Sprout Conveyor

Tobacco System

PU Belt Conveyor

Customized Machines

Double Layer Conveyor

Cooling Line

180° Turning Conveyor

90° Turning Conveyor

Bottle Conveyor Line

Horizontal Conveyor

Inclined Conveyor

Stainless Steel Mesh Conveyor

500L Silo

Packaging System 1

Packaging System 2

Packaging System 3
